Welcome to **The MET**

Your Gateway to Excellence in Medical Education!

At The MET, we are committed to providing transformative and personalized USMLE training that equips students for success on a global stage. Our mission is to equip students with the knowledge, skills, and support needed to navigate this critical journey seamlessly. Through innovative programs, expert guidance, and a dedication to each individual's success, we aim to foster a new generation of globally competent and compassionate healthcare practitioners.

Collaborators in Excellence

We take pride in our collaborations with industry leaders, including:

McGraw Hill Access Medicine

In tandem with McGraw Hill Access Medicine, we set a new standard for USMLE Training. Our partnership brings forth a trove of resources and cutting-edge materials, ensuring that our students receive an unparalleled educational experience. Together, we are sculpting the future of healthcare professionals.

First Aid

Our collaboration with First Aid is more than a partnership—it's a journey toward exam brilliance. Together, we provide students with expert guidance and resources to not only meet but exceed the standards of medical examinations. This partnership is the cornerstone of success from medical school to residency.

Boards and Beyond

Our alliance with Boards and Beyond supports medical students with on-demand video libraries and question banks designed to build a solid foundation of understanding that goes beyond memorization.

These partnerships enrich our training programs, ensuring students have access to cutting-edge resources and educational materials.

METTA: Macaw Edu Tech Training Academy

Dr. Anup Bhattacharya

- Temple University, University of Pennsylvania

Graduating with honors from the University of Pennsylvania in 2013, Dr. Anup Bhattacharya holds a BA in Biological Basis of Behavior and Economics. Pursuing his MD at the Lewis Katz School of Medicine at Temple University, he achieved a score of 261 on USMLE Step 1 in 2018.

Dr. Dylan Eiger, MD

- Harvard /Brigham and womens Hospital

A graduate of Duke University, Dr. Dylan Eiger earned his BS in Chemistry with a concentration in Biochemistry in 2016. Matriculating into the MD/PhD Duke Medical Scientist Training Program, he achieved honors in all clinical rotations and was accepted into Alpha Omega Alpha.

Dr. Sarah Godfrey, MD, MPH

- Harvard University, Columbia University

Completing her medical school, MPH, and internal medicine residency at Columbia University, Dr. Sarah Godfrey is currently pursuing a combined fellowship in cardiology, advanced heart failure, and palliative care at UT Southwestern.

Dr. Rhodes Hambrick, MD

- NYU School of Medicine

A Howard Hughes Medical Institute Researcher during his MD pursuit at NYU School of Medicine, Dr. Rhodes Hambrick received the AOA Award for the highest scholastic rating throughout medical school.

Dr. Caleb McEntire, MD

- Columbia university of physicians and surgeons

A fellow in neuroimmunology and neuroinfectious disease at Massachusetts General Hospital, Dr. Caleb McEntire combines clinical care with clinically-focused research, with a strong emphasis on medical education.

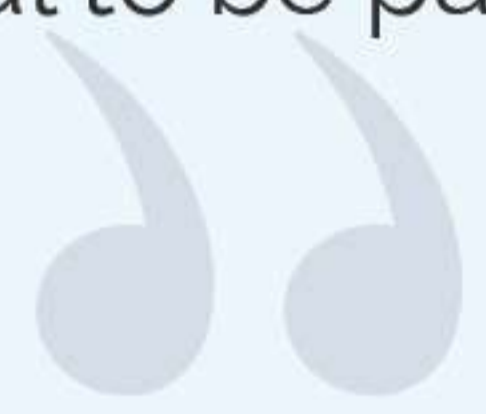

PATHWAYS TO **VICTORY**

Discover the stories of students who seamlessly transitioned into successful medical careers. Their testimonials reflect the impact of our training programs on their academic and professional paths.

The MET has been a transformative journey for me. The personalized approach to learning, expert guidance, and comprehensive training not only prepared me for the USMLE but also shaped my entire medical education. Grateful to be part of a community that truly cares about success!

Dr. Sarah Matthews

The MET exceeded my expectations in every aspect. The commitment to excellence, global exposure, and unwavering support make it stand out. Proud to be part of a community that not only trains for exams but also prepares us for a successful medical career

Dr. Raj Patel

Choosing The MET was the best decision for my academic journey. The tailored programs, exceptional mentors, and holistic support paved the way for my success. It's not just a training center; it's a family that believes in each student's potential

Dr. Deepa shree

06

OUR FOUR VERTICALS

PATHWAY PROGRAM

Center of Excellence
Training

Clinical Rotations

ERAS/CV
Preparation

Residency matching

01

Center of Excellence Training

At The MET, our Center of Excellence (COE) Training Vertical is your gateway to comprehensive and tailored medical education. We are proud to partner with industry leaders, McGraw Hill, First Aid Forward, and Boards and Beyond, to bring you the highest quality learning resources and a cutting-edge curriculum.

Comprehensive Training Team

We boast a team of three trainers per session, ensuring a diverse range of perspectives and methodologies. This triad approach enriches your learning experience and provides holistic insights into each topic.

Strategic Topic Coverage

Our training program is strategically designed to cover each topic in three phases. In the first week, Indian trainers lay the foundation by focusing on fundamentals. The following week involves high-yield training, and in the third week, the topic is revisited by renowned trainers from McGraw Hill Trainers.

Continuous Reinforcement

Weekly drills keep your knowledge sharp and continuously reinforce the previous week's topics.

Premium Learning Resources

Our training integrates premium resources from McGraw Hill, Boards and Beyond, First Aid Forward, and Q Bank. This curated blend of materials ensures exposure to the best educational content available, enhancing the depth and quality of your learning.

Structured Study Planning

We understand the importance of organized study schedules. That's why we provide specific study planners and schedules to cover all subjects systematically.

Mentorship for Personalized Guidance

Mentorship is seamlessly embedded in our training program. Our experienced mentors provide personalized guidance, addressing your unique challenges and helping you navigate the complexities of medical education.

02

Clinical Rotations

We have strategically partnered with 28+ hospitals to ensure our clinical rotations offer a diverse and enriching environment. This collaboration provides you with an opportunity to experience various healthcare settings, enhancing your practical skills and understanding.

Our program boasts several distinctive features:

01 Diverse Specialties

Dive into rotations across various medical fields, broadening your understanding and refining your skills.

02 Tailored Learning

Customize your rotations, aligning them with your interests and career objectives for a personalized experience.

03 Hands-on Experience

Engage actively to gain practical insights, bridging the gap between theory and real-world application.

04 Expert Preceptors

Learn from seasoned professionals serving as your preceptors during rotations. These experts are committed to guiding you, sharing invaluable experiences, and providing mentorship, ensuring you extract the utmost from your clinical exposure.

05 Flexible Duration

Choose between Short-Term Rotations, ideal for focused exposure and exploration, and Long-Term Rotations, providing comprehensive immersion for in-depth learning.

06 Assured Letters of Recommendation

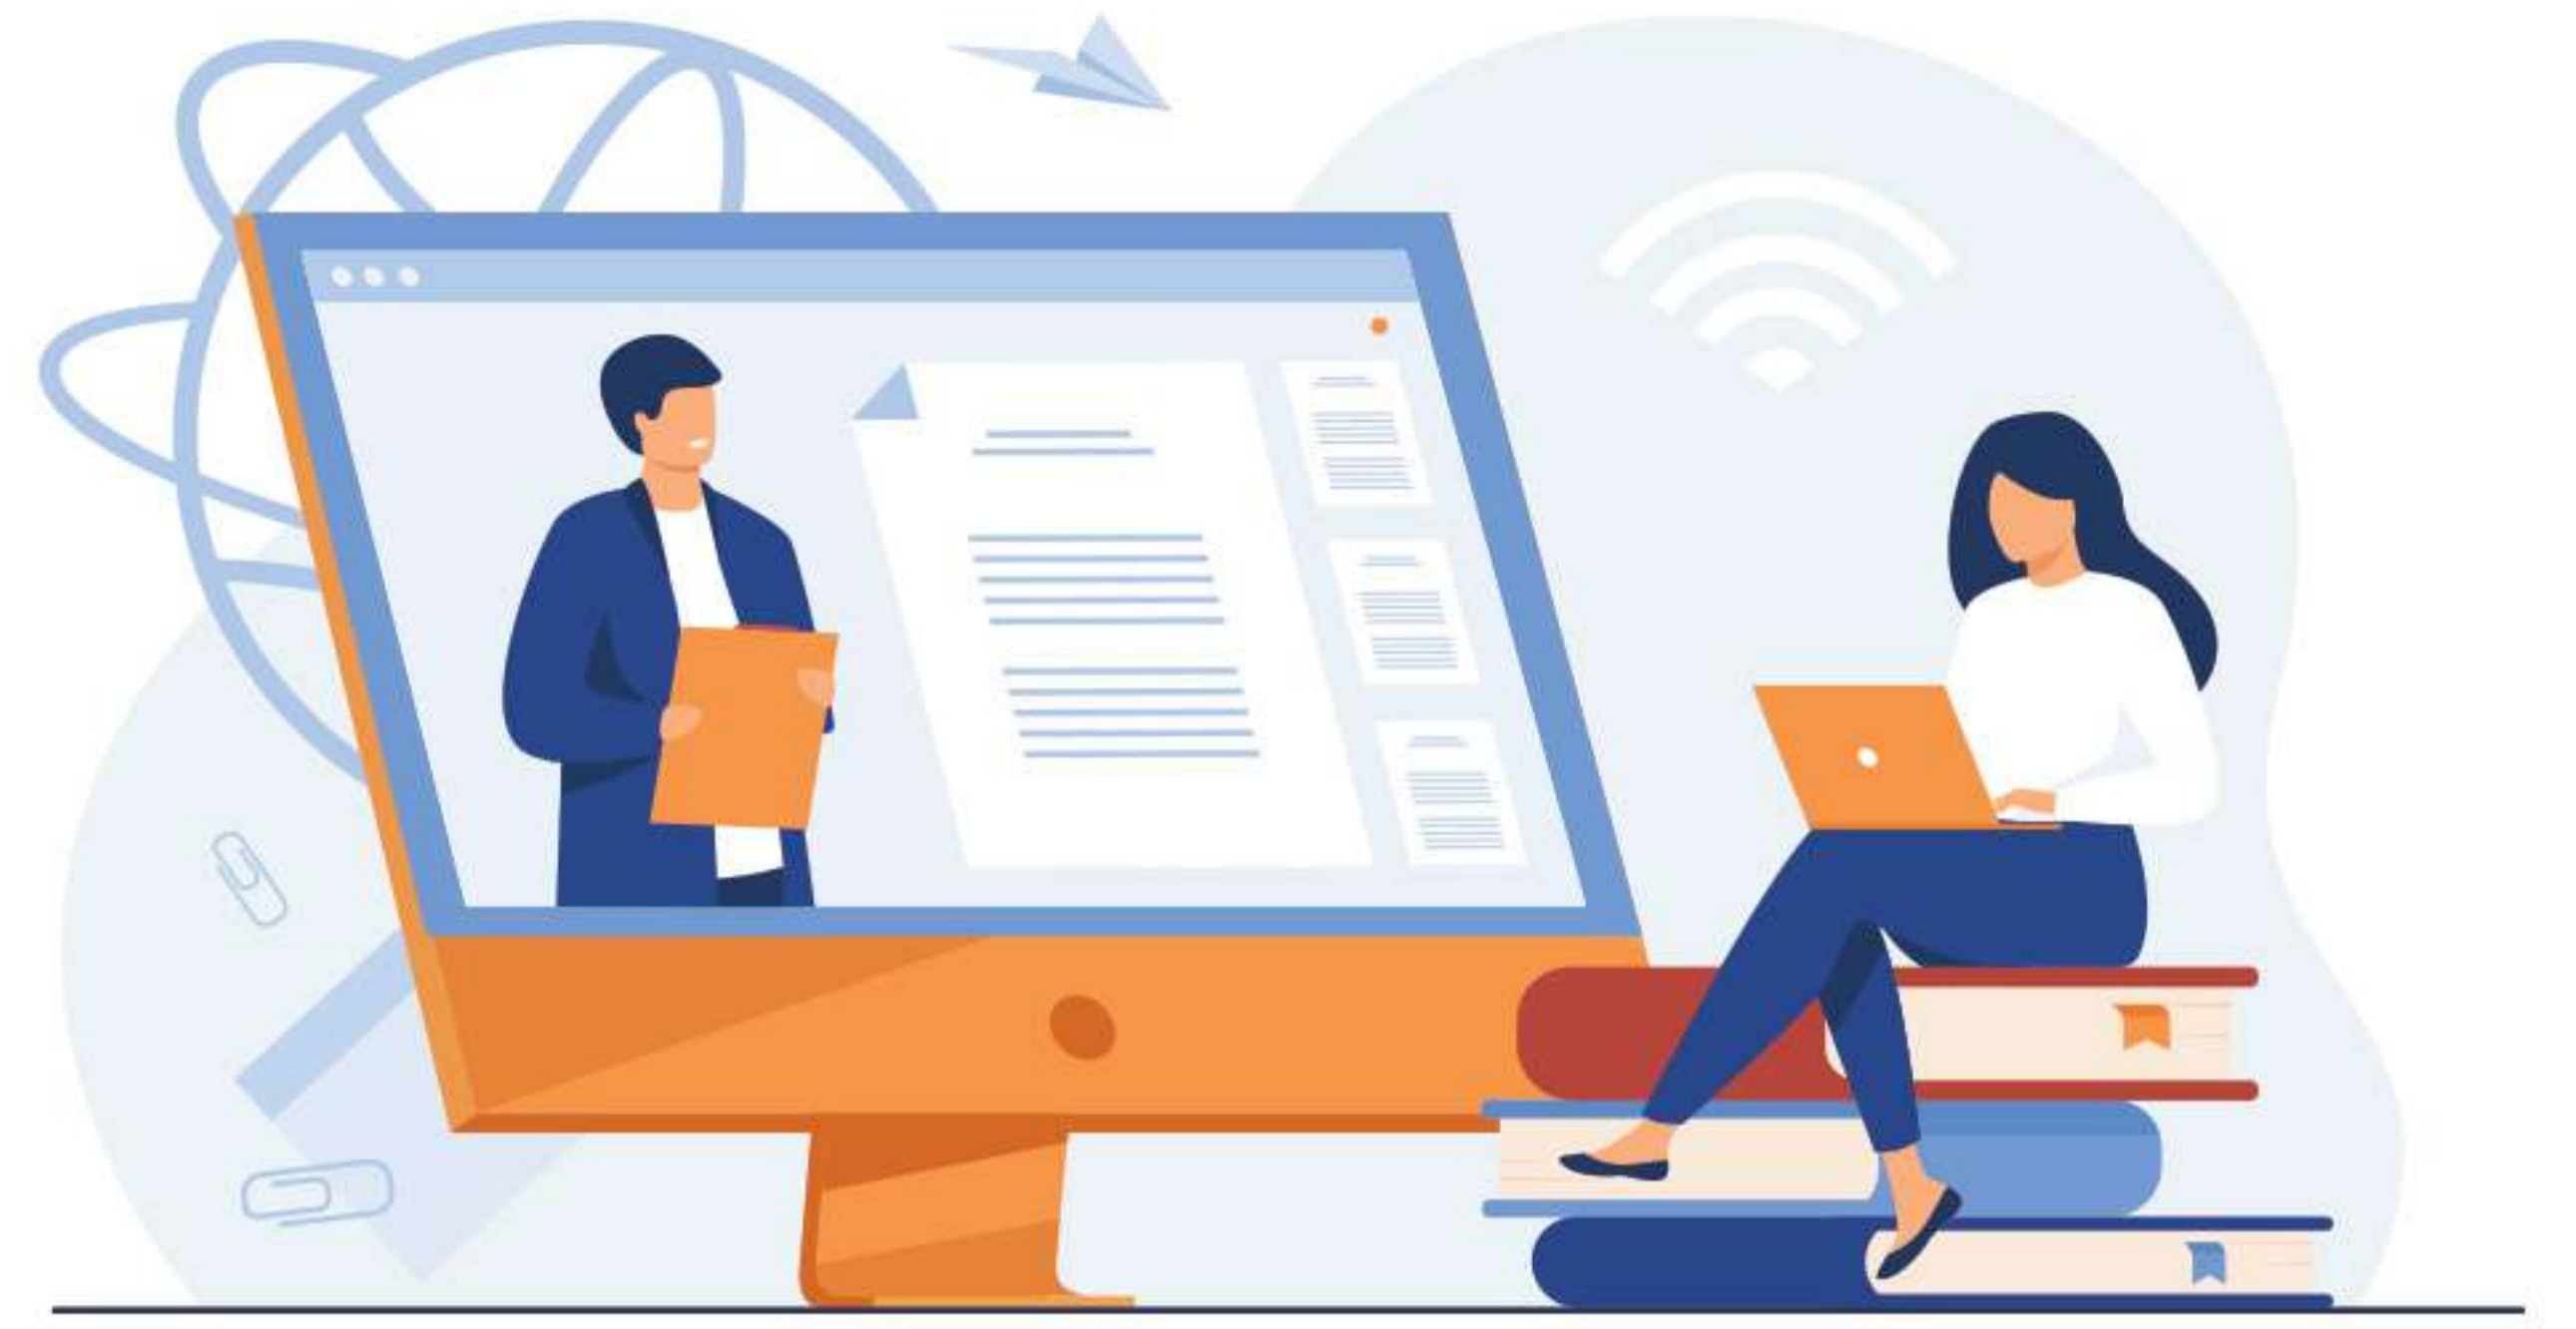

As part of our commitment to your success, The MET guarantees Letters of Recommendation upon completing your rotations. These LORs, thoughtfully crafted by your preceptors, stand as a testament to your clinical proficiency and dedication, enhancing your prospects for future academic and professional pursuits.

03

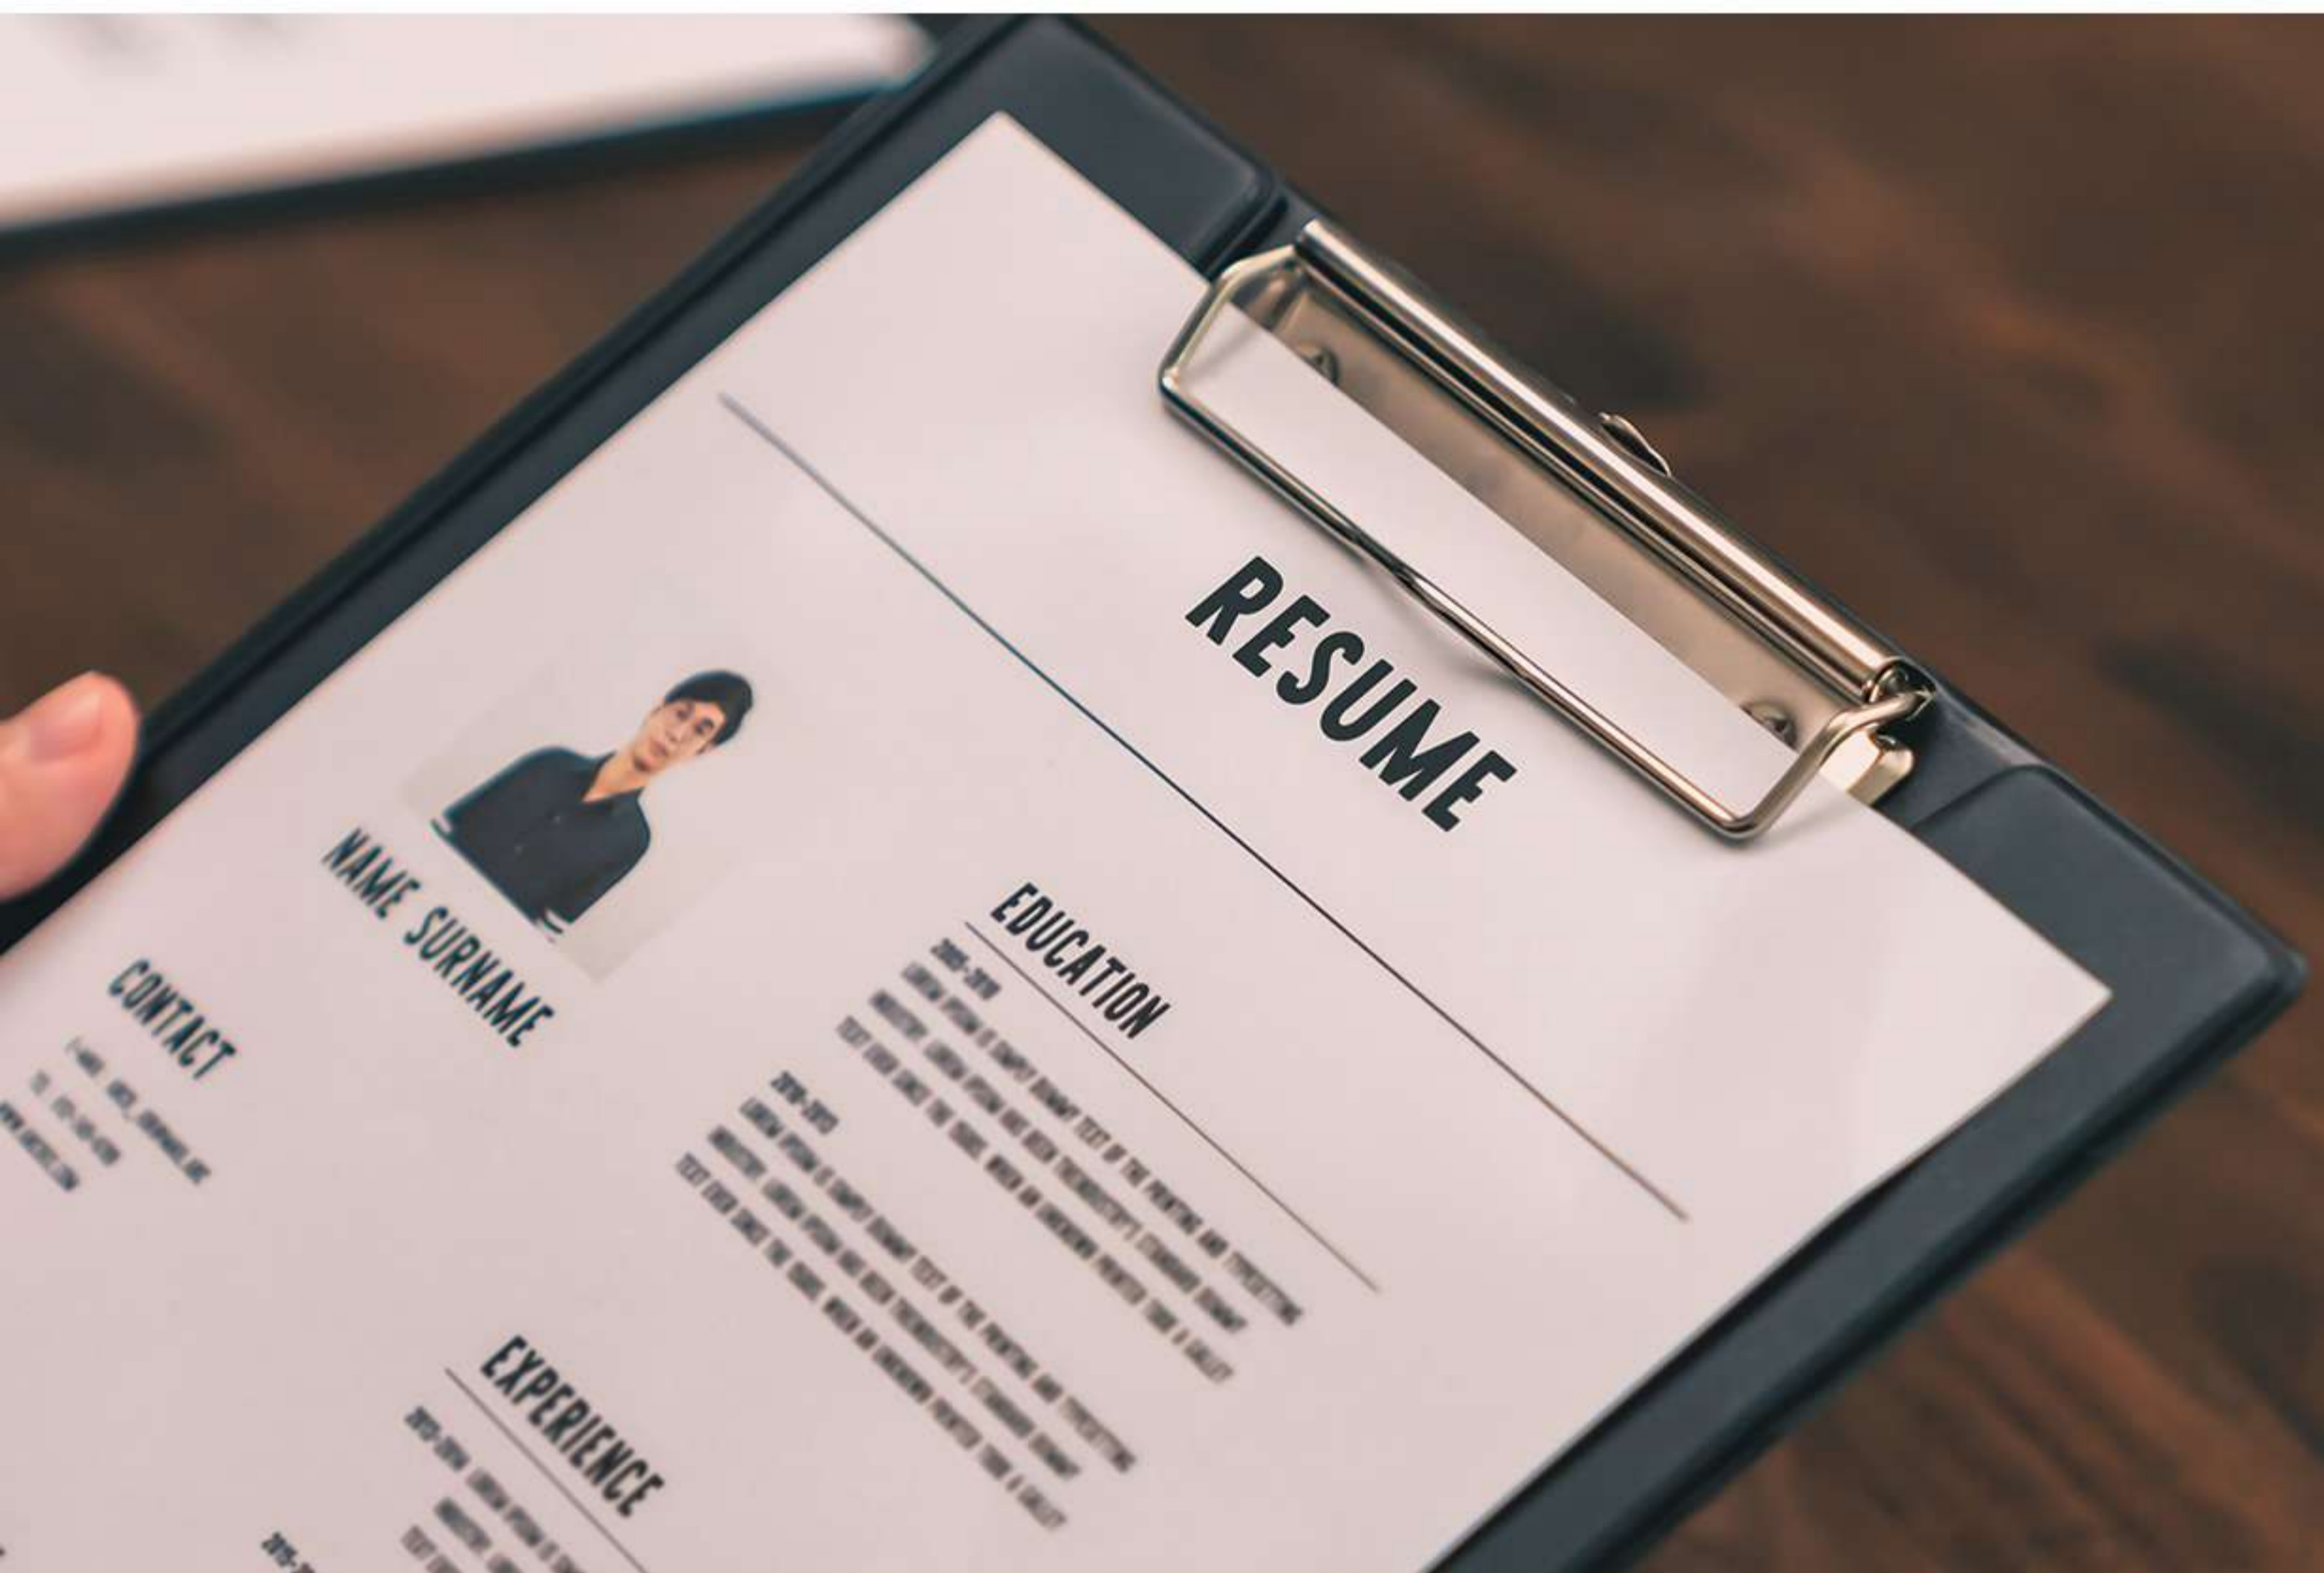

ERAS/CV Preparation

Navigating the residency application process is made seamless with our comprehensive guidance and support. We assist you in creating a standout Electronic Residency Application Service (ERAS) application and a compelling Curriculum Vitae (CV) that effectively showcases your achievements and potential.

In the realm of ERAS Application Guidance, our program highlights include Personal Statement Enhancement, where you can craft a compelling narrative that accentuates your aspirations and accomplishments. Additionally, we offer support in securing impactful letters of recommendation from experienced preceptors and ensure your ERAS application is optimized to stand out among the competition.

Our program focuses on preparing a CV that effectively communicates your qualifications and experiences, making a lasting impression on residency program directors. Program features include a Comprehensive CV Review, ensuring alignment with residency program expectations, Strategic Content Development to tailor your CV to emphasize relevant experiences and achievements, and Formatting Guidance for a professional and organized presentation of your credentials.

Specialty-specific questionnaires are tailored to your hospital and specialty choice, ensuring thorough preparation for the unique aspects of your desired residency program.

Our program also guides you on **What to Ask in an Interview**, aiding you in showcasing your interest and making informed decisions about your future residency.

04

RESIDENCY MATCHING

In the journey toward a successful residency match, our Residency Match Vertical provides a comprehensive approach starting with Match Strategy Development. This involves crafting a personalized strategy tailored to your unique goals and preferences. Our experienced mentors collaborate with you to understand your strengths, goals, and preferences, ensuring a strategy that maximizes your chances of a successful match. The program highlights include an Individualized Strategy, Timeline Management to meet all deadlines, and Strategic Application Planning to optimize your application for your desired specialties.

As you progress to the Interview Preparation phase, our specialized module ensures you are well-prepared for residency interviews. The Interview Module covers Effective Communication Skills, helping you master the art of clear and confident communication. It also includes Specialty-Specific

Interview Practice, allowing you to prepare for questions relevant to your chosen specialties. Additionally, you'll learn Etiquette and Professionalism, understanding the do's and don'ts of interview etiquette, ensuring you make a lasting impression during the interview process.

OUR DYNAMIC ARRAY OF **TRAINING MODULES**

Transformative Training

Crafting Strong Foundations for Every Stage of Your Medical Journey

If you are eager to establish a solid foundation in fundamental medical sciences, seek re-education on basic sciences, and aspire to be a globally ready doctor, our Transformative Training is your gateway. This program is not just for specific academic years but welcomes students from 1st to 4th year and above. Offering a flexible schedule with four weekends in a month, our course ensures that you get personalized attention. Every fortnight, distinguished professors from McGraw Hill will guide you through the intricacies of medical sciences. Weekly drills are integrated into the curriculum, reinforcing your understanding. Commit to at least 2 hours a day, and let us shape your foundational knowledge for a successful medical journey. The duration of this course is 12-18 months, allowing for in-depth learning and mastery of essential medical concepts. Join us on this transformative journey to excellence.

Essential Training

A Strategic Leap Towards International Excellence

For those already scoring 50% and above in basics, the Essential Training program takes you further. Open to 3rd, 4th, and 5th-year students, this program is designed for candidates familiar with international gate tests. With a commitment of 4 study hours a day, you can stand out and embark on the journey to becoming an international doctor with Essential Training.

The Essential Training program offers an intensive learning experience. Training occurs over 2 weekends a month, with esteemed professors from McGraw Hill joining every fortnight to provide expert insights. The curriculum includes weekly drills and review sessions, ensuring a comprehensive understanding of medical sciences. The duration of this course is a focused 6 months, allowing for concentrated learning and proficiency enhancement.

Conductive Program

Mastering Global Medical Sciences

For those who have already mastered basic sciences, gained familiarity with global gate exams, and are wholeheartedly committed to pursuing PG overseas, the Conductive Program beckons. Open to 4th and 5th-year students, this program is designed for individuals willing to dedicate a substantial 6+ hours a day to their studies.

The Conductive Program provides an immersive learning experience. Training occurs intensively, with sessions held every week led by international professors. The curriculum includes weekly drills and review sessions, ensuring a comprehensive understanding of advanced medical concepts. The duration of this course is a concise 3 months, offering a focused and impactful learning journey. Master global medical sciences with the Conductive Program and set the stage for an illustrious international medical career.

FEE STRUCTURE

Our commitment to accessible education is reflected in our transparent and competitive fee structures. Connect with our advisors to explore tailored options for your chosen program.

	Program Duration	Fee
Transformative Training	12-18 months	\$2500 USD
Essential Training	6 months	\$2000 USD
Conducive Program	3 months	\$2500 USD

***Note:** All fees include comprehensive study materials, mentorship, and access to our collaborative resources with industry leaders.
